[1] QID: 17 Question : A loop attempts to access characters beyond the string length, causing an excepti

on. Fix the boundary condition. public class Q17_Boundary{

public static void main(String[] args) {

String str = "Java"; for(int i=0;i

Program : public class Q17_Boundary{

public static void main(String[]args){ String str="Java";

int count=0; for(int i=0;i

Input : (no input)

Output : String is:4

[2] QID: 18 Question : An array assignment uses an invalid index, leading to an error. Identify and corr

ect the index usage. public class Q18_ArrayBounds {

public static void main(String[] args) {

int arr[] = new int[3]; arr[2] = 10; System.out.println(arr[2]); } }

Program : public class Q18_ArrayBounds{

public static void main(String[]args) {

int arr[]= new int[3]; arr[2]=10; System.out.println(arr[2]); }}

Input : (no input)

Output : 10

[3] QID: 29 Question : . A substring operation attempts to access indices beyond the string length. Iden

tify and correct the error. public class Q29_Substring {

public static void main(String[] args) {

String str = "Java"; System.out.println(str.substring(2, 4)); }}

Program : public class Q29_Substring{

public static void main(String[]args){

String str="java"; System.out.println(str.substring(0,2)); }}

Input : (no input)

Output : ja

[4] QID: 3 Question : A program attempts to print the length of a string but results in a runtime excep

tion. Analyze the issue and modify the code to handle it properly. public class Q2_NullPointer {

public static void main(String[] args) {

String str = null; if(str != null)

System.out.println(str.length()); else

System.out.println("String is null"); }}

Program : public class Q2_Nullpointer {

public static void main(String[]args){

String str="Reehan";

if(str!=null){

System.out.println(str.length());

```
}else {
```

```
System.out.println("sttring id null"); } }
```

Input : (no input)

Output : 6
